# HOMES OF COMFORT

HOW  
**CRANE**  
FIXTURES  
HELP  
TO  
MAKE THEM  
POSSIBLE

FOUNDED BY R. T. CRANE, 1855

**CRANE CO.**

245 MASTER STREET  
PHILADELPHIA, PA.

## *Comfort in the Home*

JUST eighty-four years ago, Adam Thompson of Cincinnati, ordered the first real bath tub ever built in America. Of solid mahogany, lined with sheet lead, it was seven feet long and weighed nearly a ton. In 1845, esthete Boston passed a law making bathing a misdemeanor, except when specially ordered for medical purposes. Just a generation ago, tin and portable tubs were in vogue. In only the last few years have taken place the enormous strides which have brought the present high standards in plumbing and made possible comfort and sanitation in the home undreamed by the people of any other time.

Now the modern refinement of the home bathroom, called by many students of civilization, the most distinct contribution to the art of living, is your peculiar possession. The daily bath in a home of convenient sanitary appointments is your birthright. No home builder makes his plans without careful consideration of plumbing fixtures and fittings.

Seventy-one years ago, Crane Co. was founded. The growth of Crane reputation for painstaking manufacture, careful inspection of materials, and absolute reliability has paralleled the development of present day plumbing. In the rapid strides of the past decade especially, it has assumed a position in the forefront. In its materials, its mechanical features and its designs, continual care, study and experiment, insure that Crane bathroom, kitchen and laundry fixtures, valves and fittings shall be the best possible for the simplest, as well as the most pretentious home, at prices within the reach of every building budget.

For the convenience of home builders and plumbing contractors, Crane has established National Exhibit Rooms in four American cities, Dominion Exhibit Rooms in three Canadian cities, and branches in 155 other cities, where the most modern equipment is shown and explained. But not everyone can conveniently visit these rooms. For those who cannot, and as a ready guide to those who do, this book is intended. It seeks to familiarize you with the most recent developments in plumbing, to aid in selecting fixtures suitable to your needs and purse, and to make your home a home of comfort.

By no means all of the extensive Crane line can be shown, but a careful selection has been made to give a cross section of the Crane line and to suggest highly satisfactory materials for any home. Any fixture shown may be ordered directly from these pages, through responsible contractors anywhere. For instance, if the Doric lavatory on page 20 is wanted, the number and size, C212-M1, 30 x 24, will completely identify it for your contractor.

## *The Bathroom Beautiful*

THE bathroom in many ways is the most important room in the house. It is the only room into which you build the furnishings and decorations, leaving them inalterable except at the cost of much trouble and money. When your guests go into it they gain an intimate glimpse of your personality.

It need not be a ready made room, in a cold monotony of white, reminiscent of the hospital. With only the devotion of the careful planning which goes into the other rooms of your house, it may be made, like the living-room, library or bedroom, to express your personal taste, your individuality.

Through the use of such simple aids as color and line, remarkable distinctive effects are being obtained. Nor is such decoration necessarily expensive. Groupings of two or three pieces in small space; a mirror with lines which repeat those of windows or walls, a graceful lavatory beneath; a color scheme carried out in tiling or other materials of floors and walls, in hangings and rugs, give distinction to simple as well as more elaborate bathrooms. Many suggestions for decoration and arrangement may be obtained from Crane color advertisements that appear in national magazines from month to month. Some possibilities are shown in the model rooms illustrated in the following pages. To whatever plan your imagination may dictate or your architect devise, Crane fixtures and fittings will lend beauty and long, unflinching service.

CRANE MODEL BATHROOM - PLAN A-1

- C 1000—17 x 27 inch *Nephar* Black and white marble lavatory with silver plated fittings.
- C 1201—Black and white marble dental lavatory with silver plated fittings.
- C 1002—55 x 27 inch *Nephar* Black and white dressing table, silver-plated ornamental legs.
- C 1116—17½ inch, bench wide *Tornia* bath, with black and white marble panels and crystal shower.
- C 260175—36 x 36 inch, 1½-inch towel rack and warmer, nickel-plated.
- C 276-24—24 x 14 inch *Tornia* vitreous china pedestal lavatory.

C 10400—*Cerigo*, all white, quiet action jet shower, with vitreous china low tank.

C 12051—Vitreous china bidet.

Price of the plumbing fixtures as listed above: (Two bids), \$4,365.00.

Price does not include the mirror or bench, which are made to order to suit varying conditions. Tiling and other appointments which we do not furnish will be taken care of by your architect and contractor.

Size of bathroom, 14 x 11 feet.

Size of assembly room, 14 x 4 feet, 9 inches.

## *For Homes of Utmost Luxury and Elegance*

MATCHING in luxurious richness the marble baths frequented by the nobles of ancient Rome is this bathroom embodying the refinements of today. In a setting of harmonious tiling are placed fixtures rich in beauty and convenience. Effectively centered is the *Tarnia* bath with a crystal shower, enclosed in plate glass. An encasing of grand antique black and white Italian marble matches the broad tops of the *Neumar* lavatory and dressing table, supported on hand chased ornamental legs of silver plate. Beside the bath a towel warmer, at the back a dental lavatory of marble, and beyond the mirrored doors a quiet *Corsyn* closet, bidet and a small *Nova* lavatory complete the equipment. Light fixtures in the ceiling and at each side of the swinging etched mirrors, aided in the winter by the grateful glow from the fireplace at the rear, illuminate a color scheme of glorious beauty. Warm buff tiles in floor and walls are emphasized by the borders in deep Venetian brown. Base moulding in cool greens and decorative panels with backgrounds of sky blue give a pleasing contrast.

CRANE MODEL BATHROOM -- PLAN C-1

C 2110-N11—12x25-inch *Elegia* vitreous china pedestal lavatory.

C 3312-A—5½ feet x 36¼ inches wide *Tarnia* porcelain enameled iron bath and shower, with plate glass shower shield with metal frame.

C 10400—*Coryn* all white, quiet syphon jet closet with vitreous china low tank.

C 1220—14 x 14 *Dentus* vitreous china dental lavatory.

"Style B" ornamental mirror and cabinet.

C 25206—6 x 6 china soap holder and grab rod.

C 25304—6 x 6 china soap holder and grab rod.

C 25150—9-inch opal glass hand rail.

Price of the plumbing fixtures listed above. (No tiles), \$948.00.

Room size, 10 feet x 9 feet, 6 inches.

## *Distinction Without Extravagance*

THAT a broad expanse of space is not essential to completeness of equipment, well displayed, is illustrated by this room of Gothic lines. The Gothic mirror above the lavatory, the panel of glass that guards the shower, and the long door mirror reflect shimmering light on the glistening fixtures. Set against the Faience tiling with pattern of flowers is the distinctive *Elegia* lavatory of Gothic design, and the tiled-in *Tarnia* bath. The Gothic note is continued in the arched doorway which leads into the auxiliary room that holds the quiet *Corsyn* closet.

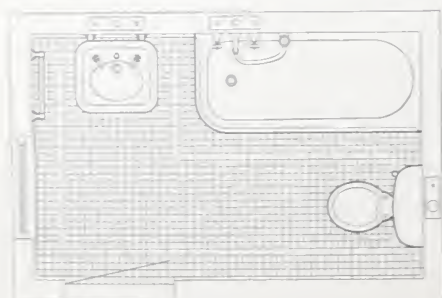

The room is replete with small conveniences: Two built-in soap dishes make it unnecessary to grope for soap; a built-in recess above the lavatory holds toilet articles; twin medicine cabinets hide behind the mirror panels; a *Dentus* dental lavatory, is shown in the floor plan but not in the illustration.

Varied color schemes may be worked out for such a room. A suggested one is gray green in the floor, the walls in a lighter tone of the same color, and the border and base in dark gray green. The Majolica squares may have a touch of contrasting color, carried out in the rug.

CRANE MODEL BATHROOM -- PLAN E-1

- C 270-S4—24 x 21-inch Nara twice-fired vitreous china pedestal lavatory.  
 C 3200-RA—5½ foot Corinth porcelain enameled iron apron bath and shower for right-hand corner.  
 C 10612—Saneto siphon jet closet, with vitreous china low tank.  
 C 26914—20¾ x 26¾-inch white finished steel recessed medicine cabinet.

- C 26102—18-inch crystal glass shelf.  
 C 25304—6 x 6-inch vitreous china soap holder and grab rod.

Price of the plumbing fixtures for this room, listed above. (No tiles), \$329.00.

Room size, 6 feet x 9 feet 6 inches.

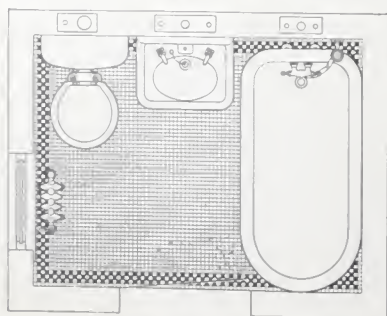

## *Grouping That Gives an Effect of Spaciousness*

THE simplest of grouping gives an impression of spaciousness to this compact bathroom, immediately pleasing to the eye. Possessing unique individuality, the arrangement keeps convenience always in mind. The *Corwith* bath, with its flowing lines, is tiled into a corner, leaving no crevice where dirt can hide. The receding planes of its front and end join with the glistening tiles and mirror in flooding the room with reflected light, enhancing the air of cheerfulness. The Venetian tiling, built high behind the bath to protect the wall against the shower, breaks the straight lines of the room into angles. Above the *Nova* lavatory, the toilet articles taken from the medicine cabinet find a handy temporary resting place on the crystal glass shelf. The *Saneto* closet with low vitreous china tank fits naturally into the ensemble. An effective color combination for the room would be white tiling, with an inlay of colored tile, used also in base board; a lighter shade repeated in the Aqua silk curtain, and walls in delicate tan, gray or taupe.

CRANE MODEL BATHROOM -- PLAN G-1

- C 3442-E9—5 foot *Doris* enameled iron bath, on feet.
- C 2210-P5—24 x 18-inch *Nevada* enameled iron lavatory.
- C 11180—*Illini* wash down closet, with vitreous china low tank.
- C 26190—15-inch nickel-plated towel bar.
- C 26902—16 x 27½-inch white enameled steel recessed medicine cabinet.

C 26610—Nickel-plated toilet paper holder.

Price of plumbing fixtures for this room as listed above. (No tiles), \$148.20.

Room size 5 feet 3 inches x 7 feet.

E

## *With an Eye to Comfort, Compactness and Economy*

THE limitations under which this room has been planned could scarcely be more stringent. For a space only seven feet long and five feet three inches wide, it is designed to fit a building budget the most limited. Yet nothing has been sacrificed in convenience, comfort, and sanitation. The *Doris* tub of iron, porcelain enameled on the inside and painted outside, is equipped with a quick-opening faucet and nozzle for the attachment of a spray, an arrangement which also may be used as a convenient method of rinsing the tub after using. Above the bath are two nickel-plated towel bars. The *Nevada* lavatory of porcelain enamel on iron has a soap depression at the back. The mirror above swings outward revealing the medicine cabinet, with a built-in recess for toilet articles below. The *Illini* closet has a low tank and mahogany finished seat. Though the utmost simplicity marks the decorations and the arrangement of the fixtures is entirely conventional the room may be made quite distinctive by the use of a pleasant coloring; cream or white for the plaster walls; a floor in mosaic tiling or inlaid linoleum with the darker hue in the inlay repeated in the enameled woodwork.

For a more detailed description of the fixtures used in this and other model bathrooms, use the plate numbers with the illustrations to refer to the following pages.

## *Lavatories That Glisten for a Lifetime*

**A**DAM THOMPSON, placing the first order ever given in America for a plumbing fixture, drew his own specifications. Buyers nowadays, unlike Thompson, do not need to do all their own planning. They only need to select. But to select wisely they should understand the materials and the important mechanical features of the fixtures they choose.

### *Twice-Fired Vitreous China --- All Clay*

Crane plumbing fixtures are made of twice-fired vitreous china, white solid porcelain, and porcelain enamel on iron. Twice-fired vitreous china is the most sanitary and durable material so far discovered for plumbing fixtures. The appearance is much the same as the finest china dishes and other table ware. It is made of a mixture of clays, flint and spar, the mixture being formed in molds and fired. So intense is the temperature at the first firing that the ware is thoroughly vitrified all the way through. After the first firing, it is dipped in glaze and fired a second time, the glaze fusing into and becoming an integral part of the ware itself. The glaze, which is a form of glass, is absolutely impervious, and is not affected by any ordinary household cleansing material, medicine or acid.

Because soils or stains cannot penetrate it, vitreous china ware is easily cleaned and retains its glistening white surface permanently.

Neither vitreous china, solid porcelain, or porcelain enamel on iron can be produced entirely free from slight blemishes. Metallic substances, melting under the heat, sometimes leave specks. Irregularities similar to painters' brush marks are sometimes left, despite careful handworking. These do not affect the utility, sanitation, or appearance of the fixture.

## *No Clogging, No Dripping, No Splashing*

SIMPLICITY, efficiency, and freedom from trouble are characteristics of Crane fixtures in their mechanical parts. The splash lip stops the rush of water from the basin when the faucet is opened. The Crane faucets close tightly with the minimum of effort, the *Agilis* with a half turn, and the *Telsa* with a full turn. The *Triumph* is self-closing. Many lavatories are built with integral back to prevent splashing of the wall.

### *Drains in Seven Seconds*

The *Securo* quick-draining waste, a feature of many Crane lavatories saves time by draining the bowl in seven seconds. It makes cleaning easier because the quick rush of water carries with it floating particles and sediment from the basin. It is fitted with a removable strainer plug which catches the hair and lint before they enter the waste lines. A slight twist removes the strainer plug for cleaning. The large draining capacity of the waste also helps to keep the waste lines open.

## A MASTERPIECE IN BLACK AND GOLD

C 100

C 100—Symmetry of proportion and richness of materials are combined in this Neumar lavatory. On graceful and ornamental legs of gold plate rests its generous top, in size 52 x 27 inches, cut from black and gold Italian marble. Gold-plated fixtures have been specially designed to harmonize with the ensemble. The inside of the roomy basin, in sparkling white twice-fired vitreous china, contrasts sharply. Its outside is decorated to match the marble. The latest Crane mechanical improvements, including the *Securo* quick-draining waste and combination supply match beauty with convenience. The price is \$1,302.00.

The polychrome paneled mirror above the lavatory, made to order only, conceals a medicine cabinet.

NEUMAR DRESSING TABLE  
TO MATCH

C 102—As a companion piece to the Neumar lavatory, a dressing table of matching size and design can be supplied. The price of the table, in Italian black and gold marble on gold-plated legs, is \$727.00.

Special sizes of lavatory or dressing table will be made to order in any grade or color of marble obtainable to harmonize with the decorative treatment of the room in which they are to be used. Price does not include the mirror and cabinet which is made to order only.

C 102

## OF STATUARY MARBLE, PERFECTLY PROPORTIONED

C 120

C 120—Severe simplicity, and materials so rich that they need no embellishment, characterize the *Marmor* lavatory. It is a fixture whose stately and unobtrusive dignity reflects the culture of those who choose it. From Blanco P white statuary marble, is cut the massive slab, 52 inches long, and 25 inches wide, which forms the top. The legs of crystal glass, and the nickel-plated mountings and fittings carry out the chaste dignity of the design. The twice-fired vitreous china bowl, blends its glistening white with the polished marble. The latest Crane refinements distinguish the fittings; the *Securo* quick-draining waste, and combination hot and cold water supply fixture. The lavatory only, equipped as shown, is \$420.00. The crystal glass shelf and mirror are specially made on order.

DRESSING TABLE OF  
STATUARY MARBLE

C 122-A—With its Blanco P white statuary marble top, in size 52 by 25 inches, and with crystal glass legs, the *Marmor* dressing table is worthy in every way to be a companion piece of the *Marmor* lavatory. The utility drawer with which it is equipped supplies a ready receptacle for much used toilet articles. The price is \$310.00.

C 122-A

Special sizes of both lavatory and dressing table will be made to order in any grade or color of marble procurable, to fit a particular room or blend with any color scheme of decoration.

C 130

# A SMALL DRESSING TABLE IN MARBLE

C 130—Of white Italian marble, this *Ornatus* dressing table is large enough for full convenience yet small enough for a room of restrictive dimensions. Its top measures 33 x 18 inches. Porcelain enameled semi-concealed wall brackets (again saving space), support it, leaving the floor free for cleaning. The price of the table is \$40.00.

The triple mirror shown is furnished to order only. The center plate, with beveled edges is 24 inches square, while the swinging side ovals are 18 inches wide and 24 inches high.

## WITH NICKEL-PLATED LEGS

C 132—The *Ornatus* is also supplied, equipped with nickel-plated legs, as shown. The price of the table only, is \$43.00. These dressing tables will be made to order of any kind or grade of marble procurable.

The mirror is furnished with nickel-plated frame and beveled plate glass mirror at additional cost

C 132

C 150-M3

### CRYSTAL LEGS ENHANCE THIS NOVA'S BEAUTY

C 150-M3—In the completely appointed bath room of today is found, not only a well designed lavatory, but a dressing table to match. Such a need is anticipated by this *Nova* lavatory, of twice-fired vitreous china, supported on crystal legs, and its companion piece to match, shown below. The two fixtures lend a pleasing air of lightness to the bathroom. On the lavatory, a china knob caps the *Securo* quick-draining waste. Its combination fixture supplies hot and cold or tempered water to the basin. In size 30 x 24, price \$137.00.

The mirror, shelf and china soap dish can be furnished at an extra price.

### A GRACEFUL DRESSING TABLE

C 152—Designed as a companion piece, this dressing table is a duplicate in design of lavatory C 150-M3. An accessory in good taste to delight the feminine heart. In size 36 x 21 inches, on crystal legs, the price is \$215.00.

Mirror has a white Sanitoure finish frame. Center mirror is 24 x 30 inches. The wings are 10 x 12 inches. The mirror is not included in the above price.

C 152

C 160-C1

WINS THE FAVOR OF PARTICULAR WOMEN

C 160-C1—Graceful legs, of the same twice-fired vitreous china material as the lavatory, lend an air of grace to this *Neia* especially designed to use as a companion piece for a dressing table of the same style. With its white fittings, its permanently beautiful ware, its integral water supply spout, and *Securo* quick-draining waste, it is an exceptionally beautiful and serviceable fixture. Made in size 30 x 24 inches. The price is \$94.00. The opal glass shelf and the mirror are not included in the above price.

A COMPANION DRESSING TABLE

C 162—The *Neia* dressing table, with its flowing lines, follows the design of the lavatory which accompanies it. Similarly molded in twice-fired vitreous china, the top measures 36 x 21 inches. The price is \$173.00. The 20 x 36-inch mirror with nickel silver frame and wings that swing outward, shown above the dressing table, is not included in the price of the table.

C 162

## INCOMPARABLE DIGNITY FOR LOVERS OF GOTHIC DESIGN

C 210-M1

C 210-M1—Crane designers took the beautiful lines of Gothic architecture as their inspiration for the creation of this *Elegia*, a lavatory of rare distinction. They spared no care and thought to produce a fixture original in effect and exceedingly popular with the lovers of the Gothic style, rich in dignity and attraction. No-where else can be found a lavatory so effective for those who wish to follow the Gothic motif in their bathrooms. The material is twice-fired vitreous china. The combination hot and cold water supply, the four armed china handles and china escutcheons, the *Securo* quick-draining waste, and splash lip complete an ideal equipment. The top of the lavatory is 32 x 25 inches. The bowl is large. To architect and home owner, the *Elegia* has instantly appealed, and is being widely used in homes where the best is demanded. The price as shown is \$175.00.

The beveled plate glass mirror, 24 x 30 inches, has a white Sanitoure finish. It will be furnished to order only. The crystal glass shelf is also supplied on order only.

WITH QUICK OPENING  
LEVER HANDLES

C 210-M2—Lever handles, opening with a half turn and easily adjusted to supply tempered water, equip this *Elegia*. Otherwise it is the same as the *Elegia* shown above. The price is \$176.00.

C 210-M2

A HANDSOME FIXTURE OF CLASSIC DORIC DESIGN

C 212-M1

C 212-M1—Impressive, distinctive, inspired by the oldest order of glorious Grecian design, this *Doric* lavatory, worthily graces any bathroom. Its studied proportioning lends the utmost in effect and convenience. The fluted pedestal is reminiscent of the ancient columns whose name the lavatory bears. As to quality, what more could be said than to plainly state its advantages; twice-fired vitreous china throughout; *Sanitary* quick-draining waste; combination hot and cold water supply; and splash lip. Imagination can hardly conceive of a lavatory more complete. Prices for size, 30 x 24 inches, \$106.00; 27 x 23, \$89.00.

The round cornered mirror, 18 x 30 inches, with nickel-plated frame, the crystal glass shelf, the towel bar and tumbler holders are not included in the price but will be supplied when specified.

A DORIC WITH QUICK-OPENING  
SUPPLY VALVES

C 212-M2—This *Doric* lavatory is the same as above, except that it is equipped with lever handles, which open fully with a half turn. It will be supplied at prices of \$107.00 for size 30 x 24, and \$90.00 for size 27 x 23 inches.

C 212-M2

## CLEANING MADE EASY BY REDUCING EXPOSED METAL TO MINIMUM

C 260-C1

C 260-C1—Compact and graceful, this *Nova* lavatory has the rounded contours which eliminate corners where dirt might cling. Easy to keep clean, its attractive appearance adds to the charm of any bathroom. Molded like all *Nova* lavatories of twice-fired vitreous china, it is illustrated here with exposed metal parts reduced to minimum. The china supply spout is an integral part of the lavatory. The fittings above the lavatory are china trimmed, from the china cross handles to the china knob on the *Securo* quick-draining waste that empties the bowl in seven seconds. Even the brass fittings below are finished in white and easily cleaned, suggesting how your every convenience has been considered.

The large mirror and the glass shelf above complete the picture of modern comfort. This and other mirrors and shelves shown in this booklet are supplied by Crane on

order, but their prices are not included in the lavatory prices given. The *Nova*, furnished in three sizes and equipped as shown, 30 x 24, \$94.00; 27 x 22, \$78.00; 24 x 21, \$71.00.

NOVA WITH QUICK-OPENING  
SUPPLY VALVES

C 260-C2—*Nova*, as shown above, except that it is equipped, for those who prefer them, with quick-opening supply valves and lever handles and metal parts below lavatory nickel-plated. Furnished at the following prices, 30 x 24, \$95.00; 27 x 22, \$79.00; 24 x 21, \$72.00.

C 260-C2

C 264-M1

#### TEMPERED WATER FOR HURRIED USERS

C 264-M1—Many people like to wash in running water, without filling the bowl. This *Nora*, equipped with *Securo* combination supply and waste fixtures, caters to their desire. All fittings are of Crane quality nickel-plated brass. Prices are: 30 x 24, \$92.00; 27 x 22, \$76.00; 24 x 21, \$69.00.

The mirror and shelf are not included in the above price.

#### WITH AGILIS DOUBLE FAUCET

C 270-S1—Equipped with the *Agilis* double faucet, this *Nora* gives tempered water and the other advantages of C264-M1, at somewhat less cost. With just a half turn of the handles, water, easily modulated to the temperature you prefer, streams from the spout. The faucet is placed at the right hand side and a soap dish at the left hand. Exposed metal fittings are nickel-plated brass. Prices: 30 x 24, \$92.00; 27 x 22, \$76.00; 24 x 21, \$69.00.

The recessed white finished steel medicine cabinet with open shelf will be supplied on order. It measures 21 x 27 inches.

C 270-S1

C 300-C1

## AN OVAL DESIGN IS A SPACE SAVER

C 300-C1—With an oval top and graceful round pedestal, this *Ovatus* lavatory fits into spaces where a square lavatory could not be used; where the corners would interfere with a door or a larger size seem cramped. Chosen often, too, for beauty entirely outside its sometimes essential practicability. China fittings leave a minimum of exposed metal parts. Twice-fired vitreous china gives the fixture immaculate beauty. An integral water spout, *Securo* quick-draining waste, splash lip and combination supply leave no convenience to be desired. Two sizes are offered; 30 x 24 inches at a price of \$94.00; and 27 x 22 inches at a price of \$78.00. An *Ovatus* dressing table to match can be supplied to those who desire it. The 18 x 30 oval mirror and shelves are extra and can be furnished when ordered.

## OVATUS FOR TEMPERED WATER

C 304-M1—This lavatory is the same as the one described above except that the spout is nickel-plated brass. In two sizes: 30 x 24, \$92.00; 27 x 22, \$76.00.

C 304-M1

C 402-C1

### LAVATORIES ON BRACKETS LEAVE FLOOR FREE

C 402-C1—Supported on porcelain enameled brackets, no floor obstruction imposes a burden on cleaning day or steals space from rooms of limited size when this *Nova* is used. The china trimmed fittings, and the twice-fired vitreous china of which the lavatory is molded are easily kept sparklingly clean. White enamel keeps the fixtures below equally immaculate. The supply spout is an integral part and the faucet handles are china. The lavatory may be had in three sizes. The prices are : 30 x 24, \$87.00; 27 x 22, \$71.00; 24 x 21, \$63.00. The recessed steel medicine cabinet with mirror will be supplied on order. It measures 21 x 27 inches,

### DRESSING TABLE ON BRACKETS

C 404—A *Nova* dressing table on brackets makes a pleasing combination with its related lavatory above. Size 36 x 21, price, \$164.00. The mirror illustrated is not included in the price and will be supplied only on order.

C 404

C 650-P9

WHEN SPACE IS LIMITED WALL  
LAVATORIES SAVE IT

C 650-P9—Though designed for use in a bathroom where space is extremely limited, the *Hermitage* is equipped with a basin and slab of ample proportions. Made of the twice-fired vitreous china which represents the best in fixture material, it has an integral back, and is equipped with *Triumph, Jr.* faucets which are self-closing and water saving. A rubber stopper and chain is provided for the waste. In size 26 x 13½ inches the price is \$40.00. The steel medicine cabinet with mirror is not included in the price, but will be furnished on order.

FOR USE IN A CORNER

C 680-S4—If the arrangement of the room is such that a lavatory to fit into the corner is desirable, this *Clifton* recommends itself. Though designed to save maximum space, the bowl has not been skimped. Made of twice-fired vitreous china, with an integral back, it has a *Securo* quick-draining waste, *Telsa* faucets, and all exposed parts nicked brass. The price in size 19½ x 19½, is \$83.00, and in size 16½ x 16½, is \$55.00.

C 680-S4

## AS SANITARY AS A CHINA PLATE

C 750-C1—A wall lavatory with metal parts reduced to a minimum to make cleaning easy, is offered in this *Clermont*. It gives all the mechanical advantages of a higher priced lavatory, including tempered water and *Securo* quick-draining waste. The integral back gives ample protection against splashing of the walls in a room which is not tiled. The lavatory is moulded of twice-fired vitreous china. The spout is integral. Four armed indexed handles and the waste knob repeat the glistening beauty, for they, too, are of china. The fittings beneath are of nickel-plated brass. The price in size 24 x 21 inches, \$63.00, and in size 20 x 19½, \$50.00.

The steel medicine cabinet, with mirror, and towel bar will be furnished on order.

C 750-C1

CLERMONT WITH METAL SPOUT  
COMBINATION FIXTURE

C 750-M1—To meet many tastes and conditions of service, the *Clermont* is supplied equipped in various ways. This illustration shows the lavatory with combination hot and cold water supply fixture with metal spout. Otherwise the same as above. Price for size 24 x 21, \$61.00; 20 x 19½, \$48.00.

C 750-M1

C 750-S5

## WITH SIMPLER EQUIPMENT

This *Clermont* is equipped with *Telsa, Jr.*, faucets for both hot and cold water supply, resulting in a saving in price over the combination faucet. The *Securo* waste has the quick-draining feature. Price, size 24 x 21 inches, \$53.00; 20 x 18 inches, \$38.00.

C 770-P5

This simplest equipment on the *Clermont* still gives satisfactory service. *Telsa, Jr.*, faucets are used, with a rubber stopper and chain for the waste. No matter what the equipment, every *Clermont* has the unperishable beauty of twice-fired vitreous china. The price is for size 24 x 21 inches, \$49.00; 20 x 18, \$34.00.

C 860-S5

SMALL BUT USEFUL.  
IS THE ARCUS

C 860-S5—In a form, the most compact, the *Arcus* twice-fired vitreous china lavatory has a bowl of average size. A 5-inch back and soap depression both cast in the fixture add to the satisfaction it gives. The *Securo* quick-draining waste is used. The faucets are *Telsa, Jr.* The price, in size 18 x 15 inches, is \$30.00. The steel medicine cabinet with mirror will be furnished on order.

C 864-P5

C 864-P5—The *Arcus* equipped with a chain and rubber stopper on the waste, but otherwise the same as C 860-S5, will be supplied in size 18 x 15 at a price of \$26.00

## A HANDY LAVATORY AND DENTAL BASIN COMBINATION

C 1200

There is something in all of us that makes a bit repulsive the thought of brushing teeth over a lavatory where we cleanse our hands and faces. The dental lavatory is daily becoming more essential in the well appointed bathroom. Where space is limited, the *Premo* offers a full sized lavatory on the left hand side and a dental basin at the right. To assure the solidity of its heavy twice-fired vitreous china top, both a pedestal leg and wall brackets give staunch support. The lavatory side is equipped with a combination hot and cold water fixture, with a *Securo* quick-draining waste. The gracefully curved gooseneck spout on the dental lavatory delivers water tempered to your preference, controlled by lever handles on either side. Openings encircle the inner rim of the bowl, cleansing it whenever used. All metal fittings below the lavatory are prepared so they may be painted, after the fixture is installed. The price of the combination, as illustrated, in size 30 x 20 inches, is \$147.00.

The 18 x 30 white Sanitoure finish mirror and 30 x 5 opal glass shelf with white finished brackets can be furnished when specified.

# INHERENT REFINEMENT CALLS FOR A DENTAL LAVATORY

C 1210

C 1210—For those who recognize the need of a dental lavatory and prefer an individual fixture, this *Lit-er-a* dental lavatory, of twice-fired vitreous china, with visible fittings china or china-encased, satisfies the most aesthetic taste. Sprays surround the inside rim cleansing the bowl each time it is used. The spout, back, the shelf that holds the brush and tube of paste, and trap, all are integral parts of the fixture. In size 16 x 16, \$57.00. The tumbler holders are not included in the price, but will be furnished on order.

## CONTROLS WATER TEMPERATURE

C 1220—With a combination fixture to answer your wish, delivering through its "gooseneck" spout, hot, cold, or tempered water, the *Dentus* lavatory, of twice-fired vitreous china, is a most desirable fixture. The integral back protects the wall. All exposed parts are nickel-plated brass. In size 14 x 14, \$51.00. The tumbler and toothbrush holder are not included in the price but will be furnished, if ordered.

C 1220

## *Economical Porcelain Enamel on Iron Lavatories Serve Splendidly*

SINCE it offers satisfactory appearance, is sanitary, gives long service with proper care, and can be had at lower prices than vitreous china, porcelain on iron remains a popular material for lavatories and other fixtures. First, the shape desired is cast of high grade, close grained iron. A base coat of enamel is applied, the piece is heated and quickly sprinkled with a coating of porcelain powder. It is then returned to the fire, the piece is withdrawn several times for successive coatings. The resulting surface is not quite so resistant to stains as twice-fired vitreous china, but will serve long and well. Since it is realized that many persons wish to take advantage of the saving to be made by buying porcelain enamel on iron fixtures, a full line is made. Many styles of porcelain enamel on iron lavatories possess all the latest Crane mechanical developments. The same painstaking care in design and manufacture is given to them as to those of higher priced materials.

C 2002-M1

#### A PORCELAIN ON IRON LAVATORY WITH PEDESTAL

C 2002-M1—The *Majestic* is an example of the handsome designs which may be had in porcelain enamel on iron lavatories. Its contours curve smoothly in a seamless sweep to the bottom of its apron. It has a combination cold and hot water supply fixture. With the *Securo* quick-draining waste, china handles, and china escutcheon, easy cleaning is insured. The price, in size 24 x 20 inches, is \$66.00; 27 x 22 inches, \$71.00.

The 18 x 30 mirror and shelf are not included in the price, but will be furnished, when ordered.

#### A VARIATION IN MAJESTIC FITTINGS

C 2002-S1—At the right, an *Agilis* double lavatory faucet, opened or closed with a half turn, to supply tempered water through a single spout, and opposite a soap dish with lip drain to keep the soap dry; are supplied with this *Majestic*. Otherwise it is the same as C 2002-M1, described above. The price in size 24 x 20 is \$66.00; 27 x 22, \$71.00.

C 2002-S1

## FOR MODEST HOMES

C 2200-S5—The *Nevada* is designed to combine economy with service where the building budget must be kept to the minimum. Porcelain enameled cast iron, in one seamless piece, with a back to protect the wall, it is equipped with conveniences found on the most expensive lavatories—the *Securo* quick-draining waste and the *Telsa, Jr.*, faucets. The exposed metal parts are of brass, nickel-plated. In size 24 x 18, \$38.00; 24 x 20, \$43.00. The combination mirror and medicine cabinet is not included in the price, but will be furnished, when ordered.

C 2200-S5

NEVADA WITH FITTINGS  
SIMPLIFIED

C 2210-P5—A chain and rubber stopper, replacing the *Securo* waste, makes this *Nevada* still more economical. In all other respects it is the same as C 2200-S5, shown above. The prices are, size 21 x 17 inches, \$30.00; 24 x 18, \$34.00; 24 x 20, \$39.00.

C 2210-P5

C 2240-S5

## COMPACT AND SERVICEABLE

C 2240-S5—Cast all in a single piece, with integral back, *Securo* quick-draining waste and *Telsa, Jr.*, faucets for hot and cold water supply, this *Norfolk* porcelain enamel on iron lavatory is a compact and economical fixture. The metal parts are nickel-plated brass. Size 21 x 18 inches is \$33.00. The combination mirror and medicine cabinet is not included in the price, but will be furnished on order.

## THE UTMOST IN ECONOMY

C 2250-P5—Equipped with a chain and rubber stopper on the waste, this *Norfolk* porcelain enamel on iron lavatory, otherwise the same as C 2240-S5, represents the utmost in economy while still giving satisfactory service. For size 19 x 17 inches, the price is \$27.00, and 21 x 18 inches, \$29.00.

C 2250-P5

## *Baths Worthy of an Emperor's Palace*

"THE emperor's palace was the most splendid in the world; it was made entirely of porcelain, so delicate that one had to take care how one touched it." So is described the splendors of an emperor of China. Solid porcelain, far from delicate, but rugged and durable, is the material of which the finest bathtubs are now made. One need not be careful how one touches it. With ordinary care, it will give satisfactory service for a lifetime.

### *White Solid Porcelain --- All Clay*

Owing to the nature of twice-fired vitreous china clay, its use is limited to the manufacture of closets and lavatories, or pieces not exceeding thirty inches in length. For baths, sinks, and other large pieces, it is necessary to have a greater thickness of clay walls to hold the great bulk together and a different body, known as porcelain, is used. Porcelain is made of selected fire clays and to decrease shrinkage, an aggregate known as grog is mixed with the clay. The body is molded into form and when thoroughly dried, several coats of vitreous china are applied to the surface and coated with a glaze. The piece is then fired at a very high heat which bakes the body and fuses the vitreous china lining with the glaze to the body. The glaze is a form of glass and is therefore extremely resistant to stains or dirt and very easy to keep clean.

In making such fixtures, minor imperfections appear which do not interfere with durability, sanitation, or appearance. White solid porcelain ware is graded, the most nearly perfect being marked "special selection" and those with slight imperfections "regular selection".

### *Porcelain Enamel on Iron*

Porcelain enamel on iron continues to hold its popularity as material for baths and larger plumbing fixtures. Many people prefer it to solid porcelain for their purposes, since it offers both attractiveness and long life at a lower price. It should give sanitary, satisfactory service for a life time, although it requires more careful cleaning to retain its first glistening whiteness than solid porcelain.

### *Concealed Fittings Aid Crane Beauty*

Crane beauty in bathtubs deserves concealed supply and waste fittings. The ugly protrusion of a net work of piping that catches dirt and dust is avoided, leaving only handles and escutcheons visible. All the working parts are hidden behind the wall. So that they may be easily reached when necessary, a utility cupboard should be provided.

GRACEFULLY MOULDED OF WHITE SOLID PORCELAIN

C 2852-LA

In white solid porcelain, with all fittings except the escutcheons and handles concealed, of the unusual width of 37 inches, built low and with a sloping end at the head, the Coronet bath, both from a standpoint of comfort and beauty, is a masterpiece. As you turn the lever handle of the Crane mixing valve, water from the 5-inch overhead shower is supplied, cold first, quickly blending to the desired temperature in a palm or less. The shower head, with face removable for ready cleaning, is fitted with an integral volume control to regulate the flow of water. The equipment is complete, even to a heavy, white duck curtain and supporting rod. A shampoo, in addition to its usual shower quality and conveniently across the tub after use. The entire equipment for the bath and shampoo also has the concealed fittings which quickly modulate the water to the required temperature.

C 2852-LA is built to be placed in the left hand corner. If the same bath for the right hand corner is desired, specify C 2852-R.A. Three sizes are supplied. Prices, completely equipped as shown (less hand rails or clip for special selection porcelain, removal sizes etc.): 5 feet, \$175.00; 5 1/2 feet, \$427.00; 6 feet, \$489.00. For regular selection, 5 feet, \$125.00; 5 1/2 feet, \$167.00; 6 feet, \$415.00.

With all shower curtains, waterproof or rubber, in gay colors to match any color scheme can be provided for any bath at slight additional cost.

## THE CORONET FITS INTO A RECESS

C 2910-LA

Because of the variety which it lends the bath room, and the possibility of using odd nooks, the recess bath is becoming increasingly popular. This Coronet, 33 inches wide, white solid porcelain bath is made for installation in a recess, with both ends and the back tiled into the walls. All piping and fittings are of the concealed type. Escutcheons and valve handles are of china and the few exposed metal parts are of nickel-plated brass. The bath is 33 inches in width. It has a sloping end at the head. C 2910-LA has the fittings at the left end of the bath. If these are desired at the right end, C 2910-RA should be specified. The price for either is: special selection porcelain, nominal size 5 feet, \$338.00; 5½ feet, \$370.00; 6 feet, \$431.00, regular selection, 5 feet, \$291.00; 5½ feet, \$317.00; 6 feet, \$365.00. The vitreous china soap dish and grab rod shown in the illustration are extra and are not included in the prices.

## THE SITZ BATH GROWS IN FAVOR

C 3106

C 3106—Convenient for a sponge bath or for use where it is not desired to use the larger bath, valuable for health purposes as well as for personal comfort and cleanliness, the sitz or hip bath is rapidly becoming more widely used in completely appointed bath rooms. This Crane sitz bath is of white solid porcelain, glazed inside and out. It is designed for tiling in at the back. The hot and cold water supplies, and the waste are combined in a single fitting, placed within easy reach of the user. The handles are of china and the exposed metal parts nickel-plated. As an added convenience in the bath-

room, it supplies a useful auxiliary. Size over all, 30 x 26 inches. Price, in special selection, equipped as shown, \$151.00. In regular selection, \$130.00

## REFRESHMENT FOR TIRED FEET

C 3120-B1—This Crane foot bath supplies an especially appreciated comfort for elderly people and invalids, as well as being appreciated by younger ones. It offers quick relief to tired, sore, or chilled feet, restoring circulation, soothing soreness and giving a delightful sense of rest. Of solid porcelain, it is made to tile into the wall at the back. All of the combination fitting for hot and cold water supply and waste is concealed behind the wall except the china handles and bell. The few exposed metal parts are nickel-plated brass. Prices for foot bath equipped as shown, 26 x 21½ inches, special selection, \$70.00; regular selection, \$61.00.

C 3120-B1

## BEAUTY OF DESIGN DISTINGUISHES THE CORWITH

C 3284-LA

lower china handles control the flow of hot and cold water to the bath and its draining. Attached to the bath nozzle is a shampoo connection. A removable face makes the 5-inch cast brass shower head easy to clean, and an adjustable ball joint changes the direction of its flow at will. The shower curtain of heavy white duck and the shower rod are supplied with the bath. C 3284-LA is for setting in a left corner and building-in the back and end. If the same bath for building-in in the right hand corner is desired, C 3284-RA should be ordered. The price for complete equipment except the vitreous china grab rod and soap dish which are extra, in nominal size 5 feet, \$191.00; 5½ feet, \$200.00.

## WITH EXTRAS ELIMINATED

C 3284-LE3—The *Corwith* with all extras eliminated, for those who wish the bath without the shower and shampoo connection, is shown. The combination supply and waste fixture is concealed. The supply spout is above the rim of the tub. The bath fits in the left-hand corner. If desired for the right-hand corner, C 3284-RE3 should be ordered. Prices are, nominal size, 5 feet, \$125.00; 5½ feet, \$134.00.

C 3284-LE3

## THE CORWITH FOR RECESS PLACEMENT

C 3308-LA

The Corwith is also made for a recess so both ends and the back may be tiled in. Fixtures are concealed within a cupboard which should be provided in the house plans for the purpose. A shower, heavy white duck shower curtain, and rod are included. The supply spout is above the rim of the tub. The three chrome handles immediately above it control the supply and waste to the bath, while the lever higher up regulates the temperature of the water to the shower. The 5-inch shower head has a removable face and an adjustable ball joint to change the direction of the stream at will. C 3308-LA has the fittings at the left end, while C 3308-RA is the same bath with the fittings at the right end. Prices, equipped as shown, except grab rail and soap dish, which are extra, in nominal sizes, 4½ feet, \$152.00; 5 feet, \$168.00; 5½ feet, \$178.00; 6 feet, \$212.00.

## RECESS CORWITH WITHOUT SHOWER

C 3308-LE1—This Corwith bath is without the shower equipment. Only the chrome handles are exposed. The water flows into the bath through a bell just below the rim. Fittings are at the left end. C 3308-RE1 is the same, except that the fittings are at the right end. The prices, equipped as shown, are nominal sizes, 4½ feet, \$100.00; 5 feet, \$116.00; 5½ feet, \$125.00; 6 feet, \$150.00.

C 3308-LE1

## THE TARNIA INVITES CHARMING TILED EFFECTS

Answering the mode for color in the bath-room, the *Tarnia* bath is designed to be encased in tiling, vitrolite, marble, or waterproof plaster. Countless decorative effects are possible, setting the key for the entire room. With low, straight sides, and a bottom broad and flat, its design achieves smartness and convenience. Of clear white porcelain enamel on iron, the *Tarnia* is made for setting in five positions; against a wall with both ends free, in recess, right or left corner, or removed from any wall. For those who desire an unusually roomy bath, it is furnished in 36-inch width in the 5½ foot size. Moderate in price, it is winning increasing favor among home-builders of taste.

C 3312-A

C 3312-A—Tiled into the wall at the back and left end, the *Tarnia* in this model has concealed fittings. A plate glass shield with metal frame forms a shower that has no use for clinging curtains. A lever handle below the two volume controls, regulates the temperature of the overhead shower with 5-inch head and four 3-inch side sprays with removable faces. Three lower handles control the supply and drain of the bath. The price complete with crystal shower (no tiles furnished) is, in nominal size, 5½ feet x 36¼ inches wide, \$607.00. The china grab rods and soap dishes are extra and are not included in the price.

## AN UNUSUAL INSTALLATION OF TARNIA AND SHOWER

C. 3313-B

Enclosed in plate glass which outside entirely screens the form of the room, with glass doors to provide an entrance to the bath, with ventilating grille and towel rack, the Tarnia towel installation is immediately apparent. All fittings are mounted. The built-in shower head has a removable hose. Price, mounted in glass, includes seat, towel rack and towel, mounted on Tj. Get a 30% value, \$175.00.

## A FREE STANDING TARNIA

C 3320-E5

A most effective setting for the *Tarnia* is in the center of the room, away from the walls, and tiled on all sides. This style is equipped with exposed hot and cold supply fittings and waste of nickel-plated brass. The grab rod shown on the rim is extra. Prices (without tile), in nominal sizes, 32-inch width, 5 foot length, \$103.00; 5½ foot, \$110.00, and 6 foot, \$122.00. In 36-inch width, 5½ foot length, \$163.00.

## AGAINST WALL WITH ENDS FREE

C 3326-B3

Built into the wall at the back, this *Tarnia* bath has the fittings concealed at the left end. By reversing the position of the bath, the fittings may be placed at the right end. The supply spout, placed just over the rim, is of nickel-plated brass. The prices as shown (no tiles), nominal sizes, 32-inch width, 5 foot length, \$93.00; 5½ foot, \$100.00; 6 foot, \$112.00. In 36-inch width, 5½ foot length, \$152.00.

## BUILT IN AT BACK AND END

C 3330-E1

This *Tarnia*, without a shower, may be built in at the back and one end in either right or left corner by simply reversing the tub. Fittings are concealed. The prices, as shown (without tiles), are, nominal sizes, 32-inch width, 5 ft. length, \$93.00; 5  $\frac{1}{4}$  ft., \$100.00 and 6 ft., \$112.00. In 36-inch width, 5  $\frac{1}{2}$  ft. length, \$152.00.

## TARNIA IN RECESS

C 3336-E2

*Tarnia* built into the wall at the back and both ends, with only the front panel exposed. The supply spout is above the rim of the tub and is of nickel-plated brass. The waste is fitted with a chain and rubber stopper. All other fittings are concealed. Equipped as shown (without tiles), the prices are, in nominal sizes, 32-inch width, 5 ft. length, \$96.00; 5  $\frac{1}{4}$  ft., \$93.00; 6 ft., \$105.00. In 36-inch width, 5  $\frac{1}{2}$  ft. length, \$146.00.

## THE VERA IS AN ECONOMICAL RECESS BATH

C 3370-RE4

Porcelain-enamelled on top and inside, and painted white outside, the Vera is an inexpensive bath for setting in a recess. The hot and cold water flows through a bath faucet with shampoo connection. The waste is equipped with a plug and chain. All fittings are desired at the left end. C 3370-LE 4 should be specified. Prices, equipped as shown, in nominal sizes: 4 1/2 feet, \$61.00; 5 feet, \$67.00; 5 1/2 feet, \$74.00.

## THE DORIS ON A BASE

C 3400-E3

Cleaning of the floor is simplified by the Doris bath with a base, nominal design. The hot and cold water supply and the waste are combined in a convenient fitting. Exposed parts are of nickel-plated brass except for the handles of chrome. Equipped as shown, the prices are, nominal size: 4 feet, \$84.00; 4 1/2 feet, \$94.00; 5 feet, \$99.00; 5 1/2 feet, \$97.00; 6 feet, \$109.00. An additional charge on extra finish will be given the outside when specified. Regularly furnished porcelain-enamelled inside and painted outside.

## A DORIS BATH ON LEGS

C 3442-E3

Economical and durable, the Doris bath gives satisfactory service when price is a prime consideration. It is porcelain-enamelled on every inside and painted on the outside. It is equipped with Teflon bath faucet for hot and cold water, and a porcelain waste and overflow with chain and rubber stopper. Exposed parts are nickel-plated brass. Equipped as shown, the price is, nominal size: 4 feet, \$61.00; 4 1/2 feet, \$61.00; 5 feet, \$61.00; 5 1/2 feet, \$69.00; 6 feet, \$67.00.

## RECESS WITH GLASS DOOR DELIGHTS THE SHOWER BATHER

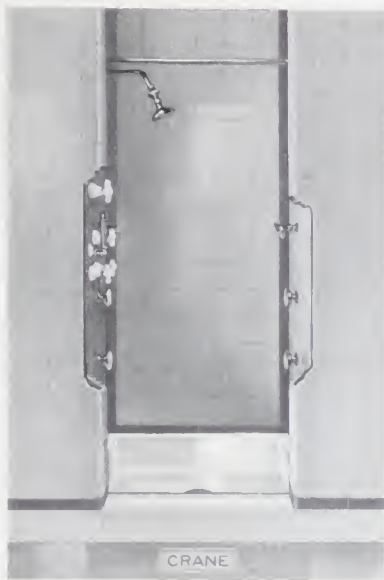

C-4003-EA

Ventilated, light, and completely enclosed the many advantages of this compartment bath will appeal to any home owner who enjoys the brief refreshment of a shower. An overhead 5-inch shower head and six 3-inch side sprays play on the body. Pivoting on ball joints, two top sprays may be kept free of the face and hair. The upper lever handle throws the water to either the shower head or the sprays, or to both at once. The lower lever handle controls the temperature of the water. A thermometer registers the temperature of the water being used. The 42-inch receptor or back of the shower stall is white, solid porcelain and comes in two grades, dental and regular selection. All piping is concealed. The exposed metal parts are nickel-plated brass. The plate glass door has a ventilating grille and metal frame. For satisfactory operation of this shower a minimum of 30 pounds water pressure must be maintained at the mixing valve. Price of equipment for this enclosed shower with regular selection porcelain receptor (inside) \$435.00; with dental selection porcelain receptor \$455.00.

PLAN SHOWING ARRANGEMENT  
OF SPEARSSECTION OF RECEPTOR  
AND REAR

## A RECESS SHOWER STARTS THE DAY RIGHT

C 4006-BA

Making possible a quick, invigorating morning bath, a shower recess in the home is a convenience that enables every member of the family to start the day in glowing spirits. When the ventilated glass door seems too expensive this shower with a white duck curtain to protect the floor makes a satisfactory installation. Shower and side sprays can be operated independently of each other or both at the same time, as desired, by means of the controlling valves. Shower is equipped with  $\frac{3}{4}$ -inch mixing valve and six 3-inch sprays, top sprays being adjustable. For proper operation of the shower a minimum of 30 pounds water pressure must be maintained at the mixing valve. Price of trimmings complete for shower stall, as illustrated (no tiles), 42-inch receptor, special selection, \$224.00; regular selection, \$203.00; 36-inch receptor, special selection, \$199.00; regular selection, \$184.00.

C 4375-B

#### SHOWER WITH HIDDEN FITTINGS

C 4375-B—This Crane shower equipment consists of a 4-inch cast brass shower head, a volume control, and a china trimmed Crane mixing valve with single lever handle which permits the user quickly to obtain a cold, hot or tempered water, as desired. On its ball joint the shower head may be directed as the user wishes, a desirable feature for those who wish to keep the head dry. The shower head has a removable face to permit ready cleaning. All piping on the installation is concealed. The china recess soap dish is extra. Price of shower equipment as shown, \$23.00.

#### FOR TUB OR SHOWER COMPARTMENT

C 4400-B—This Crane shower is equipped with a 4-inch cast brass shower head and two concealed valves, to control the temperature and the force of the water. The shower head has a ball joint enabling the user to change the direction of the stream. The soap dish is an extra. Price of shower equipment as shown, \$12.00.

Both showers on this page are of brass, nickel-plated, and may be installed at the end of a tub, or in a recess or stall.

C 4400-B

C 4436-G

#### SHOWER FOR EXPOSED INSTALLATION

C 4436-G—When conditions are such that installation of a concealed shower is prohibited, this exposed type is provided. All brass-metal parts are handsomely nickel-plated. The Crane mixing valve, directly connected with the 4-inch cast-brass shower head, has the feature of control of temperature at the will of the user with a single lever handle. Cold water first obtained is tempered to the heat desired in a turn or less of the lever handle. The price of the equipment, as shown, \$30.00.

#### TWO-VALVE EXPOSED SHOWER

C 4464-G—Of simple design, this Crane shower is efficient. Two china handles control the flow and temperature of the water. The 4-inch shower head, with removable face, has a ball joint to permit its being moved to different angles. The price of the equipment as shown is \$19.00.

C 4464-G

## *Syphon Jet Closets, the Most Sanitary Made*

**S**TUDY and experiment have been devoted in unstinted measure to providing in Crane closets both the mechanical perfection so important to this fixture and an appearance worthy of the beautiful lavatories and tubs with which they are to be used.

The vigorous syphon jet action, designs that give both sanitation and beauty, and twice-fired vitreous china ware are the three basic points of superiority to be found in the Crane closets.

Of the syphon jet closet, the House Beautiful Building Annual says: "The difference in cost between this and less expensive closets is so slight that it should not be considered except when the most stringent economy is necessary." In the Crane syphon jet closets, water movement through jet at the bottom of the bowl creates prompt syphonic action, very strong and thorough. The water level drops rapidly, completely emptying the bowl as the flow from the flushing rim cleanses the sides. The large water surface in this type bowl reduces the exposed, soilable area. The deep water seal gives greater protection against sewer gas.

Greatest care is taken in building the mechanical parts of Crane closets to make them as nearly trouble-proof as possible.

C-10394

### QUIET, SANITARY, ATTRACTIVE

C-10394—A scientific study of construction built at the best and the tank has resulted in overcoming, in the superior Crane design, the objectionable sounds of flushing and refilling. It has a modified air supply. In addition, the siphon jet action and two-fold internal chamber make it one of the best choices obtainable. This construction includes a chair with long seat and back, in white finish, a desirable addition for the sake of appearance, and providing a handy dressing seat. The low exposed metal parts are of nickel-plated brass. The price complete, as illustrated, \$144.00.

### EVERY DETAIL SNOWY WHITE

C-10400—From its nickel-plated vitreous china ware and Sanitary seal, even to the china enclosed connection from which the water flows from the tank to the bowl, every part of this Crane is all-white. There are no exposed metal parts to polish. The low tank is of the latest approved type for residential installation. The thorough siphon jet action is quiet. The white Sanitary finish of the seat is easy to keep clean. Price, fully equipped as shown, \$102.00.

C-10400

## QUICK AND VIGOROUS IS THE FLUSHING ACTION OF THE SANETO

C 10602

C 10602—With a syphon jet construction which gives an exceptionally quick and vigorous flushing action, the *Saneto* is one of the best types of closets made. The ware is twice-fired vitreous china. An extended lip at the front meets the growing demand for this type of construction. It gives more room and assures a cleaner bowl. The design, simple and graceful, harmonizes with the best Crane lavatories and baths. All exposed metal parts are nickel-plated brass. The seat, an ebony finish hard rubber composition, especially developed for the purpose, will not split, warp or discolor. The price, equipped as shown, \$56.00. This type also can be furnished in the junior size, with bowl 13½ inches high.

## SANETO WITHOUT LIP

C 10612—With a birch seat, mahogany finished; with some variations in the metal fittings, and without the extended lip, this *Saneto*, otherwise matches style C 10602. The price of closet and tank, fully equipped as shown, is \$43.00. It can also be furnished in junior size, with bowl 13½ inches high.

C 10612

C 11010

#### MAURETANIA WITH REVERSE TRAP CONSTRUCTION

C 11010—The twice-fired vitreous china *Mauretania* closet, with tank of the same material, has the well-known reverse trap construction. The flushing action depends upon the rush of water from the flushing rim which raises the water level sufficiently to force the water over the dam of the trapway. The action is thorough and satisfactory. The mahogany finish birch ring seat and cover contrasts pleasingly with the glistening white of the vitreous china. The exposed metal parts are of nickel-plated brass. Price, as shown, \$35.00.

#### A SATISFACTORY, INEXPENSIVE CLOSET

C 11180—This *Illini* closet, with both tank and bowl of twice-fired vitreous china, has the wash-down syphon action. Less expensive than other closets shown, it still is a satisfactory fixture. The ring seat and cover are birch with mahogany finish. Exposed metal parts are of nickel-plated brass. Price, fully equipped as shown, is \$31.00.

C 11180

## A VALUABLE CONTRIBUTION TO CLEANLINESS

C 12651

SECTIONAL VIEW SHOWING  
CONSTRUCTION OF BIDET

Long in favor abroad, the *Bidet* is coming into more general use in America as its valuable contribution to personal cleanliness becomes better understood. It can be used immediately after the closet and for convenience often is installed next to it. A jet of water blended to the desired temperature and under complete control may be directed with sufficient force to thoroughly cleanse. The *Crane Bidet* illustrated, of twice-fired vitreous china, is equipped with a combination fixture to supply hot and cold water. The cross handles on the left-hand side control the temperature and volume of water to thoroughly cleanse the bowl after using. The center knob is used to drain the bowl and the two china handles on the right control the temperature and the force of the cleansing spray. All exposed metal parts are nickel-plated brass. Price, equipped as shown, \$71.00.

## BIDET FOR COLD WATER ONLY

C 12653—This fixture is the same as C 12651, except that it is equipped for cold water only. One faucet controls the water supply to the jet and the other one the supply to the rim for cleansing the bowl. The center knob is used to empty the bowl. Price of *Bidet*, equipped as shown, \$61.00.

C 12653

MODEL KITCHEN

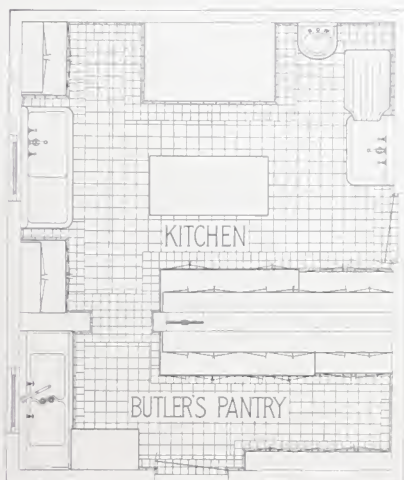

C 19110-LB—61 x 26 inches white solid porcelain single drainboard sink with swinging spout, special selection, \$230.00; regular selection, \$190.00.

C 19160-B—36 x 24 inches, white solid porcelain, extra deep sink, and swinging spout fixture, equipped with 30-inch dash drainboard and telescopic support, special selection, \$142.00; regular selection, \$133.00.

C 800-S5—20 x 18 inches, Chelsea twice-fired vitreous china lavatory, \$38.00.

C 19500—Modified 5 foot 10½ inches by 27 inches, two-compartment nickel-silver butler's pantry sink with shelf, \$436.00.

Tile, table, stove or cabinets are not included in the above prices, but can be supplied.

FLOOR PLAN OF KITCHEN AND PANTRY

E

## *Crane Fixtures Make Pleasant Kitchens*

NOWHERE does careful planning and judicious selection of plumbing fixtures yield greater results in labor saved, convenience, and pleasant home-making than in the kitchen. Here half the work of the housewife centers. Whether large or small, the room may be planned to make kitchen work more of a joy and less of a burden. Crane fixtures shown on the following pages suggest equal convenience for the mansion or the modest bungalow.

A model kitchen for a spacious home is illustrated. In this completely equipped kitchen, every facility has been provided. Two sinks, from the regular Crane line, both of white solid porcelain, are placed one on each side of the room. C 19110-LB, at the left, 61x26 inches, with a swinging spout on the hot and cold water supply, is intended for general use; for washing dishes, pots, pans and other utensils. Sink C 19160-B, at the right, in size 36x34 inches, is used for washing vegetables, chilling celery and for other purposes for which it is not desirable to utilize the general purpose sink in which soaps and washing powders have been placed. The time-saving utility of the small Chelsea lavatory at the rear of the kitchen will readily be recognized. It is a convenient fixture for the use of the maid before serving, and sets a standard for thoughtful cleanliness in the kitchen. The room is plentifully supplied with the new steel cabinets for dishes, pots and pans. A commodious work-table in the center is handy to both sinks and the combination gas and electric range. The kitchen is made cheerful through the use of color in the dark green tile floor border, the cushioning rubber squares of the main part of the floor, the side walls of glossy tile in warm buff tones, and the variegated dark green of the base and door borders. The ceiling of glossy white reflects light through the room. A butler's pantry adjoining, shown in the floor plan, is equipped with a Crane nickel-silver, two-compartment sink for serving purposes and for the cleansing of fine china and crystal, silver and other valuable pieces. The cushion effect of the nickel-silver sheeting on a base of wood prevents chipping or breakage.

## DOUBLE DRAINBOARD SINK OF WHITE SOLID PORCELAIN

C 19100-A

the entire unit. The Crane Apollo double drain offers the advantage of a washing space from which the flow of tempered water can be directed outward. The polished china soap dish is a part of the latest fitting. All exposed metal parts are nickel-plated brass. Equipped as shown, 17 inches long x 24 inches wide, special selection, \$191.00; regular selection, \$162.00; 21 inches long for 30 inches wide, special selection, \$228.00; regular selection, \$183.00.

## A SIMILAR SINK WITH SINGLE DRAINBOARD

C 19110-LA—It is a fact known to the convenience of a commodious sink compartment and drainboard. An exceptionally large compartment and roomy single drainboard is supplied with this white solid porcelain sink which lends such substantial beauty to any kitchen. As illustrated, the drainboard is at the left side. If preferred at the right, C 19110-RA should be ordered. Price, complete with the Apollo faucet and nickel-plated fittings, exactly as described above, size 22 x 24 inches, special selection, \$202.00; regular selection, \$166.00; 21 x 26 inches special selection, \$227.00; regular selection, \$187.00.

C 19110-LA

## FOR TILING INTO THE WALL

C 19128-LE

In kitchens with tiled walls a splash back is not essential. This white solid porcelain fixture is built into the wall at the back leaving no crack or crevice for water and dirt to lodge. From concealed piping a swinging gooseneck spout projects; the force and temperature of its flow controlled by five-ball handles at either side. The total length is 61 inches; the width 27 inches. Supported on porcelain legs. All fittings are of nickel-plated brass. Equipped as shown, special selection porcelain, \$169.00; regular selection, \$141.00.

Can also be furnished in the 52 x 23 inch size special selection \$152.00; regular selection, \$128.00

## OF WHITE SOLID PORCELAIN WITH MOVABLE DRAINBOARD

C 19152-B

C 19152-B—A drainboard which can be swung out of the way when not needed is a convenience appreciated by many people, especially when economy of space is desirable. In this white solid porcelain sink, the drainboard swings against the wall. When in use it is placed in position, but at all other times it is kept raised, leaving the space free. The ash wood used in the 30-inch hinged drainboard is ideal for the purpose. The 9-inch integral back protects the wall from splashing water. Equipped with a concealed combination hot and cold water faucet with a swinging spout. The top of the rim of the sink is 36 inches from the floor, the new height that saves

many a backache. Price, equipped as shown, 24 x 22 inches, special selection, porcelain \$122.00; regular selection, \$115.00; 30 x 22 inches, special selection, \$131.00; regular selection, \$124.00; 36 x 24 inches, special selection, \$142.00; regular selection, \$134.00; 42 x 24 inches, special selection, \$162.00; regular selection, \$144.00.

## AN EXTRA DEEP SINK WITH HINGED DRAINBOARD

C 19160-A—The advantages of this extra deep sink are obvious. Of white solid porcelain, it has a 9-inch integral back and a 30-inch drainboard of ash, with nickel-plated cast brass hinges and telescopic brace. The *Agilis* double faucet is of the quick compression type, giving a full stream of water with a slight turn of china lever handles. The convenience of the swinging spout and china soap dish have been described before. Equipped as shown, 30 x 22 inches, special selection porcelain, \$128.00; regular selection, \$121.00; 36 x 24 inches, special selection, \$140.00; regular selection, \$131.00.

C 19160-A

## THIS EXTRA LARGE SINK IS NEVER CROWDED

C 19180-J

One of the largest residential sinks made, this porcelain enamel on iron fixture is so commodious that its owner never has the inconvenience of sink and drainboard piled so high with dishes that no space is left to wash them or to place them when dried. It promotes orderliness and saves breakage. The roomy drainboards on each side of the compartment give an effect of symmetry. The supporting legs are adjustable, placing the top of the sink from 30 to 36 inches from the floor, to suit the convenience of the user. On the integral splash back is an *Agilis* double faucet for hot and cold water, with a china soap dish and swinging spout which adjusts the stream to suit. The price is:  $60\frac{1}{2} \times 20\frac{1}{4}$  inches, \$120.00;  $74\frac{1}{2} \times 20\frac{1}{2}$ , \$141.00;  $74\frac{1}{2} \times 22\frac{1}{2}$ , \$147.00.

## BRACKETED SINK LEAVES UNOBSTRUCTED FLOOR

C 19184-K

Of the same roomy dimensions, with drainboards at either end, as sink C19180-J, this model has no legs. As a result, the floor is left free and scrubbing or sweeping is made easier. The *Agilis* double faucet with the swinging spout tempers the water and directs it where needed. Equipped as shown, size  $60\frac{1}{2} \times 20\frac{1}{4}$  inches is, \$112.00;  $74\frac{1}{2} \times 20\frac{1}{2}$ , \$133.00;  $74\frac{1}{2} \times 22\frac{1}{2}$ , \$139.00.

## WITH ADJUSTABLE LEGS

C 19190-LJ

A sink at exactly the right height to prevent the fatiguing strain of stooping over the fixture means a great saving of the housewife's energy. Only with a fixture that can be installed in accordance with the height of the person who is to use it, can this advantage be obtained. The porcelain enamel on iron sink shown is supported by two legs which may be adjusted so the top of the rim is from 30 to 36 inches from the floor. The *Agilis* double sink faucet and swinging spout is supplied with a china soap dish. All metal parts are of nickel-plated brass. C 19190-RJ is the same as the above, except that the draining shelf is at the right side. Price, as shown,  $52\frac{1}{4} \times 20\frac{1}{4}$ , \$93.00;  $52\frac{1}{4} \times 22\frac{1}{4}$ , \$97.00.

## SUPPORTED ON BRACKETS

C 19194-LK

Supported on concealed brackets, this porcelain enamel on iron sink leaves the floor free. Except that its *Agilis* faucet has no soap dish attachment, it is exactly the same as C 19190-LJ, and like it may be installed at the most restful height. If the draining board is desired at the right instead of the left, C 19194-RK should be ordered. Price,  $52\frac{1}{4} \times 20\frac{1}{4}$ , \$85.00;  $52\frac{1}{4} \times 22\frac{1}{4}$ , \$89.00.

## ECONOMICAL WITHOUT SACRIFICING CONVENIENCE

C 19250-LK

More economical than those previously shown, this porcelain enamel on iron sink has most of their desirable features. Adjustable legs place the top at the most convenient height, anywhere between 30 and 36 inches from the floor. The Crane double sink faucet with swinging spout blends hot and cold water. Nothing has been sacrificed in this style which takes away from its utility. Equipped as shown, 52 inches long by 20 $\frac{1}{4}$  inches wide, it is \$65.00. Can be furnished with concealed brackets instead of legs, if desired.

## IN SIZES FOR EVERY REQUIREMENT

C 19320-R

The many sizes in which this convenient, space-saving and economical sink is made permit the selection of a fixture to suit a wide range of kitchen requirements. For those who have the space to install an extra large sink, a 42 x 22 inch size can be supplied. For those who have a small kitchen and must save space to the utmost, a 24 x 16 inch size is made. Many people prefer this style for use as a utility sink in the basement. Concealed white enamel on iron brackets hold it in place. A pair of Crane-Morton brackets of red brass, nickel-plated, supply the hot and cold water. The 24 x 16 inch size is, \$35.00; 24 x 18, \$36.00; 30 x 18, \$40.00; 20 x 20, \$35.00; 24 x 20, \$38.00; 30 x 20, \$42.00; 36 x 20, \$46.00; 36 x 22, \$49.00; 42 x 22, \$55.00.

## PANTRY SINKS OF RUSTLESS NICKEL-SILVER

C 19490

Nowhere may more handsome fixtures of this type be found than in the Crane line. This sink of gleaming nickel-silver, with exposed fittings of white metal, has twin draining shelves. The sink is first constructed of wood. All parts are then covered with sheet nickel-silver, resulting in a cushion effect which reduces breakage to the minimum. The compartments for washing and rinsing are divided by an S shaped partition which provides recesses for the two standing wastes, freeing the compartments of their interference. The wastes are easily removable for quick draining, and with the overflow are arranged so as to keep the water level at a fixed point, making it possible to have the supply flowing continuously. An exceptionally long, swinging spout carries the water from the concealed combination supply fixture to either compartment. A slight upward curvature of the spout tends to stop dripping after the supply is turned off. Equipped as shown, in size 78 x 24 inches, with a splash back 12 inches high, \$317.00.

This type sink can also be made to order of monel metal with white metal fittings or of planished copper with red metal fittings and in any reasonable size to suit the space you have to fill. The convenient cabinet illustrated is not included in the price but can be furnished on order to suit individual requirements.

## BUTLER'S PANTRY SINK OF NICKEL-SILVER

C 19500

Set on metal legs, with all fittings of polished white metal, this nickel-silver pantry sink is constructed along the same lines as C 19490, including the draining shelves at each end, two compartments with S partition, supply and waste arranged for continuous running water, and upward curved, swinging spout. Also it has a box back 12 inches high, to prevent splashing of the wall, and concealing the supply fittings without necessity of building them into the wall. The capping of the box back provides a convenient shelf. The fixture, overall, is 78 inches long and 27 inches wide. Price as shown, \$394.00. This sink will be made to order in monel metal with white metal trimmings, in planished copper, with polished red metal fittings, and in any reasonable size to suit conditions.

## PANTRY SINK FOR RECESS

C 19506

Made to build into a recess, the pantry sink here shown is 78 inches long and 27 inches wide, overall. It has 12-inch back and ends to guard the walls, is fitted with two compartments, with straight dividing partition, swinging spout, and concealed hot and cold water fixture. In gleaming nickel-silver with white metal fittings, equipped as shown, \$174.00.

This sink will be made to order in monel metal, with white metal trimmings, and in planished copper with polished red metal trimmings, and in any reasonable size to suit conditions.

## COMBINED SINK AND LAUNDRY TRAY SAVES STEPS

C 21102-LN

In small apartments or houses, where there is only a moderate amount of laundry, or where a convenient method for washing lingerie and other dainty articles of apparel is lacking, this white, solid porcelain combination sink and laundry tray is especially advantageous. Perhaps the basement is not suitable for the purpose or is a long distance away. Then such a fixture saves steps and eliminates the unpleasing use of bath-room fixtures for laundry purposes. On the right side of this double-utility fixture is the sink. On the left is the full sized laundry tray. An ash drainboard resting over the tray may be shifted to the sink when the tray is used. Supported on porcelain legs, the rim is 36 inches above the floor. A section taken from the front in the illustration shows the construction. There are two sets of supply faucets, one for each compartment.

Price, size 51 inches long and 23 inches wide, special selection, \$186.00; regular selection, \$159.00; 42 inches long and 23 inches wide, special selection, \$167.00; regular selection, \$143.00.

C 21102-RN is the same as described above, except that the sink is on the left and the laundry tray on the right-hand side.

## COMBINATION FOR SMALL HOMES

C. 31134.

A combination sink and vanity, one of the most modern in use, this design is suitable for small homes or apartments. It is manufactured in porcelain enamel and has a large offset front and a wide base to be adjusted from 22 1/2 to 34 1/2 inches from the floor. An elegant double basin with one sink is placed at the back, over the partition, and is equipped with a draining rack to save water consumption. A porcelain sink is mounted in front, which can be placed over sink or shower, as desired. The 18 x 22 inch sink is priced at \$117.50. An additional year, the combination can be had with the popular pedestal sink design, which can be used in a variety of ways.

## LAUNDRY TRAYS IN BATTERY SAVE LIFTING CLOTHES

A weary back, aching arms, a vast amount of wash day fatigue may be eliminated with laundry trays, placed in battery, to make it possible to run clothing through the wash with the least labor in transferring from one compartment to another, and the minimum trouble in changing water.

C 21160

Battery made up of three separate compartments is shown in the illustration. Any number of trays may be used in this way. The trays here shown are of white, solid porcelain, the best material for this purpose, making almost effortless their cleaning after using. Supported on solid porcelain legs. Each unit is 30 x 26 inches, with 8-inch back. A pair of Crane *Agilis* faucets for hot and cold water supply each compartment. One cold water faucet has attachment for a hose. Price of three trays, equipped as shown, special selection, porcelain, \$312.00, regular selection, \$285.00. Can also be furnished in the 26 x 26 inch size with 9 inch back. Price of each tray, special selection, \$287.00. Regular selection, \$263.00.

## LAUNDRY TRAYS OF ALBERENE STONE

C 21274

Economical, sanitary and durable, Alberene stone has been found to be a material well adapted to laundry trays. It is a natural quarried stone, gray in color and of uniform density and hardness. These Alberene stone laundry trays are made in one, two or three compartments, supported on cast iron legs. In the type illustrated the back extends 12 inches above the trays. The first section is equipped with a double *Telsa* faucet with spout, pail hook and hose attachment. The second and third compartments have *Telsa* short pattern faucets in pairs. Equipped as shown, the three-compartment tray in size 72 x 24 inches, is \$119.00; 78 x 24 inches, \$133.00; 84 x 24 inches, \$140.00; 90 x 24 inches, \$147.00. For two-compartment, 48 x 24 inches, \$71.00; 54 x 24 inches, \$75.00; 60 x 24 inches, \$80.00. For one-compartment, 24 x 24 inches, \$37.00; 30 x 24 inches, \$42.00; 36 x 24 inches, \$47.00. These trays can be furnished with backs 6 or 16 inches high and can also be made of clear black or ribbon slate if desired. Polished wringer guards supplied at additional cost.

## INEXPENSIVE TRAYS OF GRANATINE OR CEMENT

C 21288

(Not illustrated) Cast of cement of a special composition, all in one piece, with steel supporting frames and metal rims and wringer guards, these laundry trays will give satisfactory service. The faucets are Crane *Telsa*, one threaded with a hose connection. The trays are supplied singly and in two or three compartments. There are nine different sizes. Prices follow: single-compartment, 25 x 24 inches, \$21.00; 27 x 24 inches, \$22.00; 31 x 24 inches, \$24.00; two-compartment, 48 x 24 inches, \$33.00; 54 x 24 inches, \$37.00; 60 x 24 inches, \$41.00. Three-compartment, 72 x 24 inches, \$53.00; 80 x 24 inches, \$57.00; 90 x 24 inches, \$61.00.

## SLOP SINKS CONTRIBUTE TO HOME SANITATION

C 21129-O

**C 21129-O**—A slop sink, eliminating necessity of makeshifts or wasting out traps or disposing slopping water is a desirable convenience which saves time and makes an important contribution to sanitation. Of white, solid porcelain, with a trap of porcelain enamel on iron, the Crane slop sink has a splash back twelve inches high. It is fitted with two Tefco faucets for hot and cold water. Faucets and rim guard are nickel-plated brass. Equipped as shown, the price, in 21 x 30 inch size, is: special selection porcelain, \$52.00; regular selection, \$47.00; 24 x 32 inches, special selection, \$59.00; regular selection, \$54.00. This slop sink can also be supplied in vitreous china.

## PORCELAIN FRAME, ON IRON SLOP SINK

A 12 1/2 inch wide, 12 inch deep, 12 inch high porcelain framed sink. This slop sink is supported on an enameled iron trap standard. It has a 12 inch splash trap fitted with a pair of Crane Tefco faucets for hot and cold water. It comes in three sizes. Price, enameled vitreous, 20 x 30, \$42.00; 22 x 32, \$45.00; 24 x 36, \$48.00. These sinks are regularly furnished mounted on the inside and covered on the outside.

C 21383-O

## *Small Accessories Add Much to Comfort*

**S**MALL things often mean the difference between comfort and discomfort. For use in the bathroom there are many accessories which every home builder should consider. A towel warmer, a glass shelf, soap dish, tooth brush and tumbler holders, towel rods, hand rails, paper holders, and strop hooks add much to the bathroom

### *Towel Warmers*

Crane towel warmers are made of nickel-plated pipe, to be attached to the hot water supply system. The hot water circulates through the pipes which not only keep towels warm but also act as a radiator, removing the chill of damp weather from the room when the main heating plant is not in operation. They also act as convenient towel racks. Supplied fully equipped with the proper valves, ready for installation.

C-20010

C-20010—Three mounting track sections for wall fast. One flange has no girth screw space. Covering screw passes nearly flat off in air. The roller is upset through the flange. Price equipped with roller, 36 x 36 inches, 1 each case, \$107.00. 1/2-inch pipe, \$127.00.

C-20012

C-20012—Three light type track sections for floor fast. The fast screw is inserted through the track connection. Covering roller passes nearly flat off in air. Price equipped with roller and bracket, 30 x 30 inches, 1 each case, \$67.00. 1/2-inch pipe, \$120.00.

C-20014

C-20014—Three heavy type, 30-inch, track sections for wall mounting. One flange has no girth screw space. The fast screw is inserted through the flange connection. Price equipped with roller, 36 x 36 inches, 1 each case, \$107.00. 3/4-inch pipe, \$127.00.

C-20016

C-20016—In this three heavy type for wall mounting, fast screw fast, roller is inserted to the track section through the wall. Equipped with connecting roller. Price equipped with roller per above.

30 x 34 inches	1 each case	\$71.00
30 x 36 inches	1 1/2 each case	\$84.00
30 x 38 inches	1 each case	\$74.00
30 x 40 inches	1 1/2 each case	\$87.00

TYPICAL INSTALLATION OF CRANE TRACK, WALKING

GLASS SHELVES AND RODS AND OTHER ACCESSORIES

C 25104

C 25104—An opal glass shelf supported on one-piece vitreous china brackets with concealed fasteners.  $\frac{7}{16}$  of an inch thick, 5 inches wide. Price, 18 inches long, \$6.60; 24 inches long, \$7.60; 30 inches long, \$9.00; 36 inches long, \$10.75.

C 27274—Oval mirror with beveled edges, a nickel-plated frame, and concealed hangers. Price, 12 x 18 inches, \$12.00; 16 x 20 inches, \$17.00; 16 x 24 inches, \$18.00; 18 x 24 inches, \$21.00; 18 x 30 inches, \$24.00.

## SOFT WATER FOR EVERY HOUSEHOLD NEED

C 46248

At every faucet you now can have running water as soft and fresh as falling rain. For the *Crane-Warlo Water Softener* takes the harsh lime and magnesia out of hard water. No chemicals of any kind are added. Only the destructive minerals are removed. Then, everything done with water is improved. Meats and vegetables are tenderer, tea and coffee more flavorful. Shampooing, washing, and bathing reach real luxury. Clothes wash whiter and last longer. And the soap savings alone practically repay your entire investment. Don't merely go on hating hard water. Your plumbing contractor will recommend the proper size Crane-Warlo softener for your home.

Price, C1—plain, \$200.00; glass lined, \$230.00.  
 Price, C2—plain, \$250.00; glass lined, \$300.00.  
 Price, C3—plain, \$340.00; glass lined, \$420.00.  
 Price, C4—plain, \$450.00; glass lined, \$560.00.

Size of tank	C1	C2	C3	C4
Inches	12 x 40	16 x 46	18 x 46	20 x 46

Type C1-S water softener is practically the same as the C1 machine, but  $\frac{3}{8}$ -inch valves and fittings are used throughout in place of  $\frac{1}{2}$  inch, and the screw clamp on the top and the wash bibb are plain brass instead of nickel-plated. Price complete, \$150.00.

## *Comfort Demands "Instant Hot Water"*

NO MATTER how carefully selected are your plumbing fixtures, they cannot make your home comfortable unless an efficient hot water system serves them. Instant hot water, always waiting day or night, in quantities sufficient for all needs, is the essential demand that Crane Premier and Keystone automatic storage gas water heaters meet. In addition they save trouble and save gas.

### *No Lighting, No Waiting*

Once you install one, you need never have another thought or worry about hot water. No more annoying waiting. Nothing you can forget. In fact, there is nothing to do but turn on the faucet. And there's your hot water!

Plenty of it, instantly; for bathing, shaving, laundering, scrubbing, dish-washing, or medical purposes. The patented thermostat control turns the gas on and off as necessary, keeping the water at 135°, or any other temperature you prefer. The insulation of the big tank holds the heat in the water. So gas economy is assured.

In addition to the *Premier* and *Keystone*, there are other types and sizes to meet all needs.

C 38150

## The Royal

NON-INSULATED AUTOMATIC  
STANDARD GAS WATER HEATER

### NON-INSULATED AUTOMATIC STORAGE GAS WATER HEATER

The Royal is for heavy duty service. It has double extra heavy galvanized steel tank, instant-action thermostat, two burners and heating elements for double quick recovery. The mechanism and materials are especially adapted to its job of supplying large quantities of "instant hot water." It is built in two sizes.

Size No. 75, 65-gallon capacity. For larger homes having extra bathrooms and club type showers. Price \$162.50 at factory. No. 120, 93-gallon capacity. A good size for apartment buildings, small hotels, office buildings, etc. Price \$187.50 at factory.

When greater amounts of stored hot water are desired, two Royals of either size can be operated in tandem or with additional storage tank.

## The Marvel

GAS WATER HEATER  
AND TANK COMBINED

### HAND OPERATED STORAGE HEATER

The Crane Marvel Heaters, hand operated and storage type, single unit heaters, not insulated, are supplied in four sizes at exceptionally low prices.

C 38152

## The Premier

INSULATED AUTOMATIC  
STORAGE GAS WATER HEATER

### INSULATED AUTOMATIC STORAGE GAS WATER HEATER

C 38160

The Premier is manufactured with handmade heavy copper tank and also with double extra heavy galvanized steel tank, heating element and circulation system of brass. Instant-action thermostat, and an outer jacket finished in fresh grey enamel with nickel trim. It is built for enduring service. With copper tank, it represents the highest degree of craftsmanship in water heater construction. In three thrifty sizes, it fits any home requirement.

Size No. 2, capacity 23 gallons. The popular size for the average home, having one complete bath together with kitchen fixtures and laundry tray. The price is \$125.00.

Size No. 3, capacity 31 gallons. This heater will take care of the home with one bath, an overhead shower and other usual fixtures, or with two complete baths and the customary fixtures in kitchen and laundry. It is also suitable for the small two-flat or duplex building with one bath for each apartment.

Size No. 4, capacity 48 gallons. In addition to having larger storage capacity this heater is equipped with two complete burners, and heating elements, making it practically a double heater. This is for the purpose of double quick recovery. It is the ideal size for homes with three or four baths, kitchen and pantry sinks, and proportionately ample laundry facilities; also, for small apartment buildings, clubs, restaurants, etc.

### PRICES OF THE PREMIER AT FACTORY

Size No.	Capacity	With Handmade Heavy Copper Tank	With Double Extra Heavy Galvanized Steel Tank
2	23 gals.	\$225.00	\$125.00
3	31 "	260.00	160.00
4	48 "	400.00	250.00

# The Keystone

INSULATED OUTDOOR OR INDOOR HOT WATER HEATER

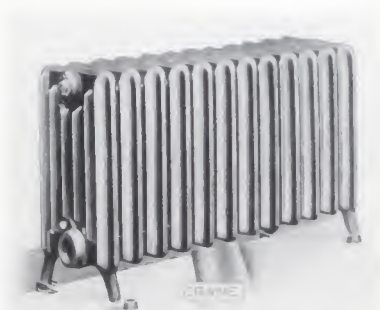

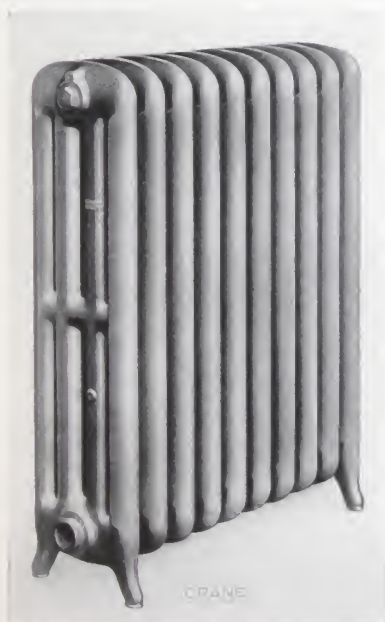

Fig. 1000

With great advantage properties of the Pressure and delivery only to the highest quality and the lowest cost, the Vacuum is very much more than just a good hot water heater. It is made in two sizes.

The 1000, 10 gallon capacity. The only one of its kind. Instead, however, and it is made in 1000-gallon capacity.

The 1000, 10 gallon capacity. The same capacity of water capacity. In fact, the only one. The only one in 1000-gallon capacity.

The 1000, 10 gallon capacity is the only one with more than one heating element. In fact, the only one with more than one heating element. The only one in 1000-gallon capacity.

COMPLETE LINE OF HEATING MATERIALS, INCLUDING  
BOILERS AND RADIATORS

## *Quality in All Hidden Fittings*

WHILE you are selecting your fixtures, remember that this booklet, designed to give the home owner a sufficient familiarity with the subject to enable him to choose intelligently, cannot begin to cover all the Crane line or its advantages. Remember also that the 71 years of Crane experience, Crane care in manufacture, in tests and inspections, the Crane reputation for reliability and fair dealing, cannot be put into words or illustrations.

Remember too that the visible fixture is helpless as a watch case minus works without the service of the valves and fittings hidden behind the walls, and too often neglected. To skimp on them courts expensive trouble. Tearing walls out to repair faulty piping materials always proves more costly than installing Crane valves and fittings.

The plumbing contractor is an expert in a complicated business. Do not attempt to plan your plumbing without his aid. He will tell you of many items in the Crane line and many Crane advantages not shown in this booklet. His advice will save you time and money.

If color schemes or other variations in bathroom design are contemplated the skilled advice of an architect will prove invaluable.

Crane materials are sold through responsible contractors everywhere. Crane fixtures, valves and fittings, carefully selected and properly installed by a competent contractor in a wisely planned home, mean a home of comfort.

## *Crane Branches Everywhere Assure Satisfactory Service*

Crane branches and sales offices in 155 cities mean that you are never far from a station where fixtures and fittings may be obtained without delay, nor from men who will give personal attention to your needs. To the Crane branches, after studying this book, you may go and personally select the materials you desire.
